Price List

(WHOLESALE)

Season
1927 - 1928

C. R. Burr & Company, Inc.
MANCHESTER, CONN., U. S. A.

The Burr way of "Quality Plus Service" makes big business, consequently we had to double our office space.

TO THE TRADE

The excellent assortment offered in this catalogue is the result of many years careful study of trade demands; also careful consideration as to hardiness and proper growing methods.

The large additions to our office, warehouses, and shipping rooms guarantee even better service this year than heretofore.

GRADES: Your special attention is called to our grade specifications, for instance; shrubs 3-4 ft., 6 branches and up, 2-3 ft., 4 branches and up; roses 2 year number one graded 18-24 in., three branches and up.

GUARANTEE: It is mutually agreed between C. R. Burr & Company, Inc., and purchaser that any stock that proves untrue to name is to be replaced free or purchase price refunded, but it is not further warranted, and it is agreed that the purchasers damage shall be limited to the purchase price of such stock. It is further agreed that we do not guarantee the life of the stock we ship, or to be held responsible for delivery in case of loss by drought, hail or other causes beyond our control.

TERMS AND CONDITIONS: We absolutely will not make any adjustment unless claim is made upon receipt of goods. ALL CLAIMS FOR ADJUSTMENT MUST BE MADE IN WRITING DIRECT TO OUR OFFICE WITHIN FIVE DAYS AFTER RECEIPT OF SHIPMENT, AND ALL ORDERS ARE BOOKED UNDER THESE CONDITIONS. Anything omitted from the shipment is to be deducted from the bill. Fall bills payable December 1st; Spring bills June 1st, except to parties of unknown responsibility, from whom we require cash or security in advance, or satisfactory references. Lots of fifty will be sold at the hundred rate, and lots of two hundred and fifty at the thousand rate. We cannot accept orders for less than ten of a variety. Prices are for immediate acceptance, subject to change without notice and stock being unsold. These conditions will carry in all bulletins for Fall 1927 and Spring 1928.

SHIPPING SERVICE: We have direct cars for New York Central, Erie, and Pennsylvania connections from Manchester nearly every day, and with our wide awake shipping department PROMPT SERVICE is guaranteed to all points. Customers are requested to give us definite shipping instructions, specifying whether by freight or express and the route. In the absence of these instructions stock will be forwarded according to our best judgment without assuming responsibility. All shipments travel at customers risk and expense and when loss occurs in transit, claims should be made to the carrier by consignee.

Our Fall business is very heavy, so in order to maintain our SNAPPY SERVICE, we cannot possibly accept orders after October 10th for shipment during October.

This list is for the trade only and we would thank anyone who would notify us if it gets into other hands, because we do not sell stock at wholesale to retail buyers. If you are not acquainted with us, kindly use printed stationery or enclose business card.

ORNAMENTAL SHRUBS

Graded as follows, except BARBERRY, SPIREA ANTHONY WATERER, THUNBERGII, and other dwarf growing shrubs, which will be bushy and strong in their respective grades.

3-4 ft. 6 branches and up

USSURIENSIS PEAR SEEDLINGS (BLIGHT RESISTANT), Ellington Farm. Excellent stand. Wonderful growth, without a doubt the pear seedling of the day. We recommend them. See picture of Japan Pear Seedlings below.

JAPAN PEAR SEEDLINGS, same farm, same field, planted at the same time and given the identical care as Ussuriensis Pear seedlings shown above. Note extremely poor stand and growth as compared with Ussuriensis seedlings. We have planted our last Japan seedlings except for comparison or experimental purposes.

Seedlings—Continued

USSURIENSIS PEAR SEEDLINGS

These seedlings are the true cultivated type and are said to be blight proof and extra hardy. This spring we made most of our plantings of this pear stock. See pictures for comparison with Japan Pear Seedlings.

PEACH TREES, Tripp Farm. We are going to tell you a story about our Peach trees.

We do not plant our peach seed in the nursery row as is the common practice. Ours are placed in a pit or bed in the fall and remain there until the following spring when they have opened and sprouted. The kernels are then carefully planted. Results — Seedlings like the picture on page 40 and finished trees that are all alike, no tap roots, just the right distance apart in the row to make quality trees. They are worth more money than the ordinary peach trees. This year many of our peaches are budded from bearing wood.

Quantity production enables us to price our goods reasonably but we do not sacrifice quality for price.
